man project "Mutant Spawn"

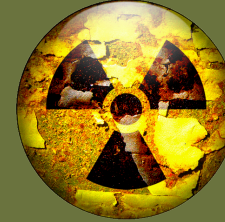

The minions of the world have yet to realize our strategy to breed nuclear mutants. We have secured the perfect place thus keeping our efforts under the military's radar. FYI- our concrete stronghold is their discard from a bygone era; a perfect location for our needs!

There has only been a slight under-ground chatter radiating from the Midwest indicating our presence. The only tangent proof of our existence are high levels of radioactive emissions. Fortunately from the area's history, I anticipate the authorities will not be suspicious of abnormal radiation levels emitted from our project.

man project "Mutant Spawn"

The mutant plot has been such a success we had to increase our production. This move has some administrators concerned since radioactive output has increased exponentially. That along with intel's latest report stating "Neighboring areas are plagued with Mutant sightings", has put the project on ORANGE alert status.

man project "Mutant Spawn"

A breach occurred with project M.S. One of our creations escaped before the mutating process was complete. The creature was captured, but not before it had recalibrate the Geiger counter's readout. Although head technician, Ann Thrax felt there is no cause for concern, I am forwarding the results for your own examination.

Our staff seems to have intercepted several pieces of paper passed around the mutant holding area. Although we believe we have collected and disposed all items, there is always the possibility that one might have made it outside our concrete walls. The cryptic message read as follows, "Find 67. Directly across. Hollow pole" ---Please advise! EVA
